

# 33X1 RR™\* brand

## 3.3 Maturity

- ◆ K gene for Phytophthora Root Rot
- ◆ Excellent score against Frog Eye Leaf Spot
- ◆ Attractive plant type really looks good out in the field
- ◆ Excels in the absence of SCN pressure

**NEW**

### Agronomics

Emergence	7
Reaches Canopy Fast	6
Stress Tolerance	7
Standability	6
Shatter Resistance	9
Mid-Season Appearance	
Late-Season Appearance	6

Fair Excellent

### Management Recommendations

Irrigation	+++
No Till	++++
Wide Rows	+++
Narrow Rows	++++
Higher Populations	+++
Lower Populations	++++
High Organic	++++
Clay and Variable	++++
Light and Sandy Soils	+++

++++ = excellent, +++ = very good, ++ = good, + = fair

### Characteristics

Plant Height	MedTall
Plant Width	Medium
Flower	White
Hilum	Black
Pubescence	LT Tawny
Pod	Tan
SCN	

### Disease Resistance

Phytophthora Root Rot	Excellent
Brown Stem Rot	Very Good
Frog Eye	Excellent
Iron Deficiency	Very Good
Sudden Death	Very Good

Fair Excellent
